

Global Technologists Ltd.

**The last word
in professional
data services.**

80% of the world's data was
created in the **last two years.**

This has been true for
the **last thirty years.**

We do data.

At Global Technologists, we know how complicated
managing your ever-growing data estate can be.

From ecosystem architecture to administration,
from performance troubleshooting to development,
from transformation pipelines to governance,
from integration to visualisation,
we've done it all.

Helping you harness your most valuable asset.

Many organisations still rely on manual reports, spreadsheets and emails to integrate and analyse their data for vital business direction and insights.

Without synthesised and useful data to inform business leaders, companies run the risk of making poorly-informed decisions.

We clean, integrate, surface and visualise your data, and put in place robust governance procedures for ongoing, effective data management.

Companies who adopt data-driven decision making are more productive and more profitable than their competitors.

[Harvard Business Review]

**It is estimated that up to
85% of data projects
don't fulfil their objectives.**

[Gartner, 2017]

We'll make sure yours do.

We build capabilities.

We work with you to assess your data capabilities
and put you on a path to future success.

We provide tailored expertise across every aspect
of data architecture, engineering and governance.

We can temporarily or permanently augment your team, and
provide targeted support where and when you need it.

**And if we don't know the answer,
we'll find someone who does.**

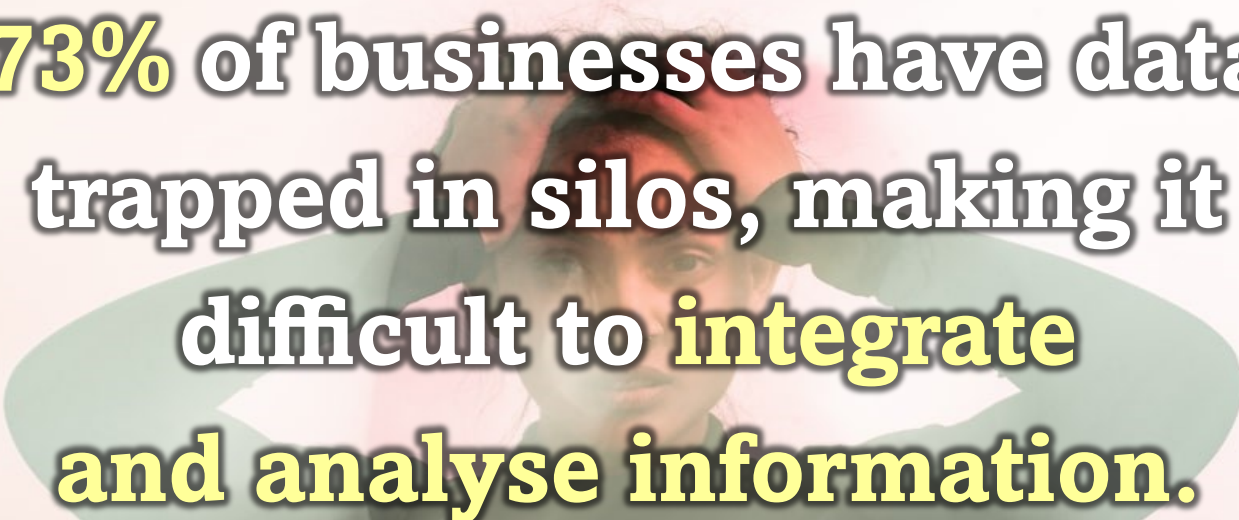

We solve data problems.

We don't care what stack you're on.

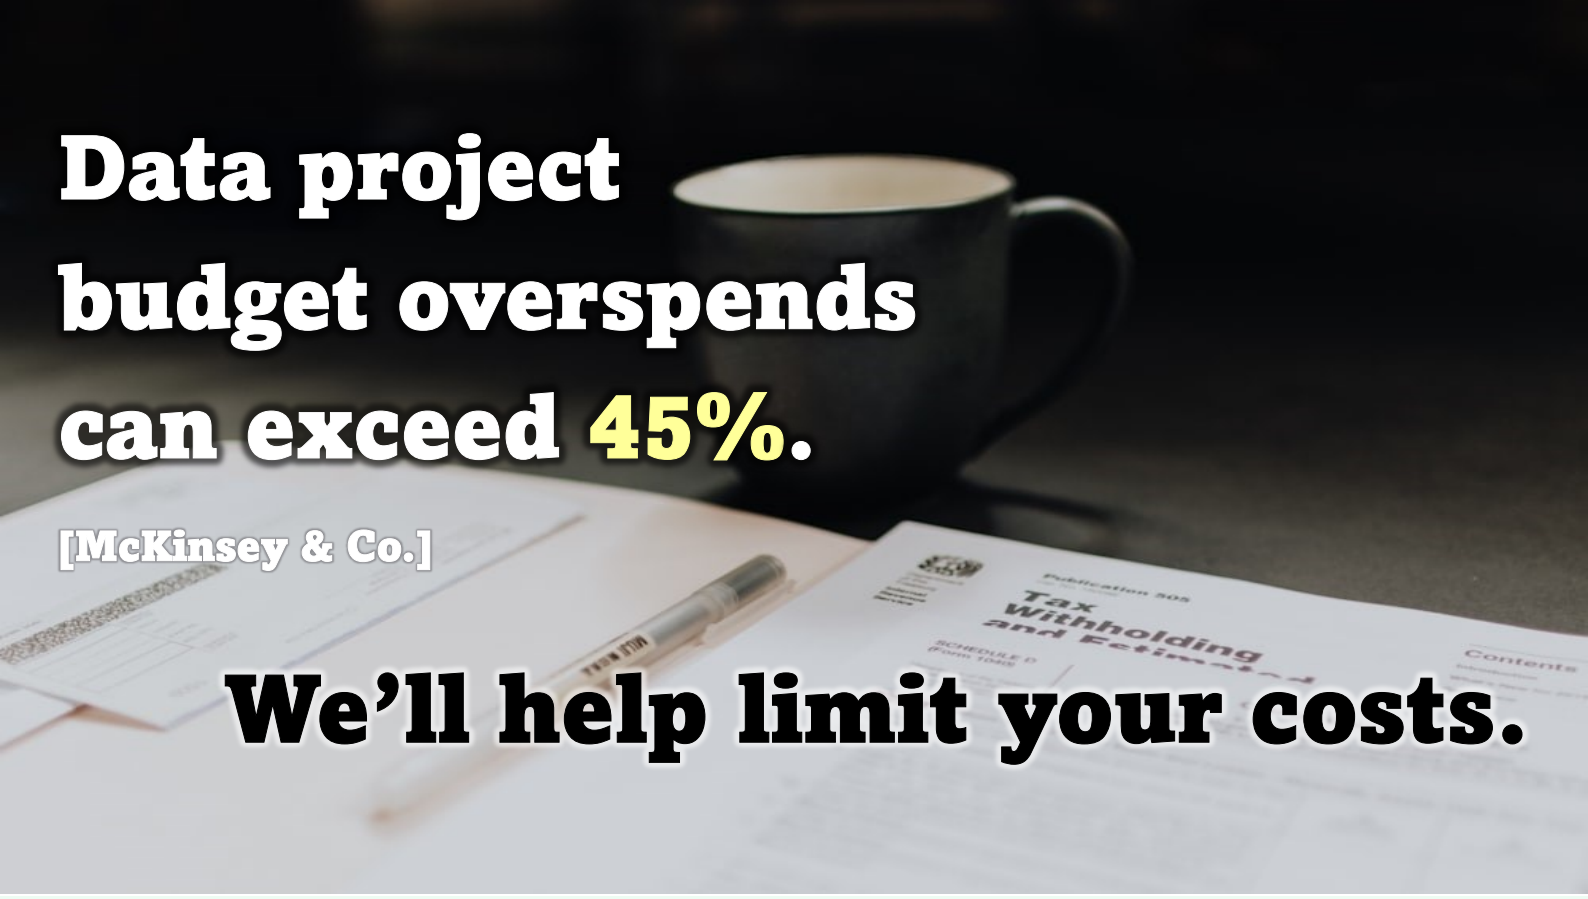

From on-premises to AWS, from Azure to GCP, whether you're using relational databases or NoSQL, whether you're in Excel, Access or SAP, we can help.

We build, maintain and troubleshoot application databases, data warehouses and data lakehouses.

We clean, transform and integrate data through pipelines, analyse, validate and visualise your data, fix performance headaches, develop new access methods, and **much, much more.**

73% of businesses have data trapped in silos, making it difficult to integrate and analyse information.

**Data project
budget overspends
can exceed 45%.**

[McKinsey & Co.]

We'll help limit your costs.

Flexible terms,
tailored to you.

We provide:

Free initial consultation

- Vetted data expertise by the hour, day, week or month —
- Competitive fixed-price work against specified deliverables —
- Bucketed hours for use as, when and how you prefer —
- Hybrid work packages to suit your circumstances —
- Generous payment terms with no deposit required —

Our span of experience
speaks for itself.
